SUMMARY

Software engineer with 3+ years of experience designing and delivering scalable, secure systems, with a strong backend focus using Python, Node.js, and ASP.NET Core, centered on API design and database modeling (SQL and NoSQL), and hands-on frontend experience with React and Angular.

- Proven ability to develop high-performance systems, implement secure authentication and authorization (JWT, RBAC), and deploy applications using AWS (Lambda, API Gateway, EC2) and Docker-based environments.
- Experience integrating AI-powered features into applications to enable intelligent, data-driven functionality.
- Comfortable owning end-to-end backend architecture independently, while adapting quickly across languages, frameworks, and tech stacks.

TECHNICAL SKILLS

Languages: Python, JavaScript, C#, PHP (familiar)

Backend: Flask, FastAPI, Django, ASP.NET Core, Express.js, Laravel (familiar)

Frontend & Mobile: React.js, Angular, HTML/CSS, React Native, Xamarin

Cloud & DevOps: AWS (Lambda, API Gateway, EC2), Docker, Linux, Nginx, Apache, CI/CD

Databases: MySQL, MongoDB, DynamoDB, Couchbase, Vector Databases

Security & APIs: REST APIs, JWT, OAuth2, RBAC, Rate Limiting, XSS/CSRF Protection

AI & Automation: LLMs, vLLM, Prompt Engineering, Embeddings, Milvus, LangChain (agents, chains, RAG pipelines), n8n Workflow Automation, Apache Airflow

Real-Time Systems: WebSockets, Socket.IO

Tools: Git, GitHub, Jira, ClickUp, Agile/Scrum

PROFESSIONAL EXPERIENCE

Backend Developer | boxMind AI *July 2023 – March 2026*

- Led backend development as the primary engineer, responsible for designing, building, and maintaining the entire backend architecture for production systems.
- Designed and implemented scalable backend architecture, structuring API layers, business logic, and database models using Flask and FastAPI.
- Led backend planning and task definition, aligning technical decisions with product requirements and system goals.
- Designed and integrated AI/LLM-powered features into backend systems, working closely with the AI team to deploy intelligent capabilities into production environments.
- Implemented secure authentication and authorization systems (JWT, RBAC).
- Optimized MySQL queries and database performance for scalability and reliability.
- Managed deployments on AWS (Lambda, API Gateway, EC2) and local environments.
- Established logging, monitoring, and error-handling practices to improve system stability.
- Performed end-to-end testing and validation of backend services and overall system functionality.

Junior Full-Stack Developer | Mobile Arts *Nov 2022 – Apr 2023*

- Developed features using ASP.NET Core and Angular.
- Migrated legacy systems to .NET Core.
- Built AWS Lambda functions and backend services.
- Improved database performance and query efficiency.

Mobile Developer | Mobile Arts *Aug 2022 – Nov 2022*

- Developed mobile applications using React Native and Xamarin.
- Participated in UI design, testing, and deployment.
- Published applications on the Google Play Store.

Mobile Development Intern | Mobile Arts *Jul 2022 – Aug 2022*

- Assisted in building mobile features and debugging issues.
- Gained hands-on experience in React Native and Xamarin.

EDUCATION

- **MERN Stack Bootcamp**, Techlarious | 2023
- **Foundations of Computer Science Bootcamp**, SE Factory | 2022
- **Bachelor of Computer Science**, Arab Open University | 2018 – 2022
- **Bachelor of Business Management**, Arab Open University | 2010 – 2016

LANGUAGES

- **Arabic** — Native
- **English** — Intermediate (Conversational)
- **French** — Basic
